

Lapse Metrics: Duration & Frequency by Genotype

GENOTYPE IMPLICATIONS:\n\nLAPSE FREQUENCY:\n Highest: -/-\n Lowest: +/+\nLAPSE DURATION:\n Longest: +/+\n Shortest: +/-\n\nINTERPRETATION:\n• Higher lapse frequency →\n Difficulty maintaining attention\n• Longer lapse duration →\n Impaired re-engagement\n• Both elevated →\n Severe attentional deficits\n\nExpected pattern:\n-/- > +/- > +/+ ≈ +\n(dose-dependent effect)
