

# STATE CATEGORIZATION HIERARCHY

## BROAD CATEGORIES (3)

**ENGAGED**  
High Performance  
Task-Focused

**MIXED**  
Strategic/Variable  
Intermediate

**LAPSED**  
Poor Performance  
Disengaged

## DETAILED STATES (5)

**Deliberative  
HP**

- Acc > 65%
- Variable RT
- Strong WSLS

**Procedural  
HP**

- Acc > 65%
- CV < 0.65
- Habitual

**WSLS  
Strategy**

- Strong WSLS
- Variable Acc
- Moderate RT

**Disengaged  
Lapse**

- Acc < 65%
- High CV
- Low WSLS

**Perseverative  
Bias**

- High Side Bias
- Low Acc
- Repetitive

### KEY DISTINCTION: Deliberative vs Procedural HP

Both achieve high accuracy, but differ in HOW:

**DELIBERATIVE:** Thoughtful, effortful, variable RT

**PROCEDURAL:** Automatic, habitual, consistent RT

Early learning → Deliberative | Late learning → Procedural

### VALIDATION CRITERIA

- Accuracy: Choice correctness
- Latency CV: Response consistency
- WSLS Ratio: Strategy use
- Side Bias: Perseveration

Automated classification with  
confidence scoring
